

Optimizing Sales Strategy for Pens and Printers

DATA-DRIVEN INSIGHTS FOR ENHANCED CUSTOMER ENGAGEMENT

Presented by Mickael Barbieri

Agenda

- Introduction to the Business Problem
- Data Overview and Cleaning
- Insights from Customer Sales Methods
- Revenue Analysis by Sales Method
- Key Observations on Sales Performance
- Trends and Patterns in Customer Behavior
- Recommendations
- Conclusion

Business Problem

Focus: Improve sales strategy through customer data analysis

Key Questions:

- Customer distribution across communication methods
- Revenue distribution overall and by method
- Revenue changes over time
- Recommendations for profitability and efficiency

Importance: Optimize customer engagement and drive business decisions

Data Overview

15.000 rows, 8 columns

- week
- sales_method
- customer_id
- nb_sold (number sold)
- revenue
- years_as_customer
- nb_site_visits
- state

Source

Pens and Printers' sales tracking system

Data Integrity

Meets ROCCC criteria (Reliable, Objective, Comprehensive, Current, and Consistent)

Data Cleaning and Preparation

Actions Taken

- Dropped rows with missing revenue values
- Converted 'sales_method' and 'state' columns to string types
- Consolidated sales method categories
- Confirmed consistency of customer tenure data

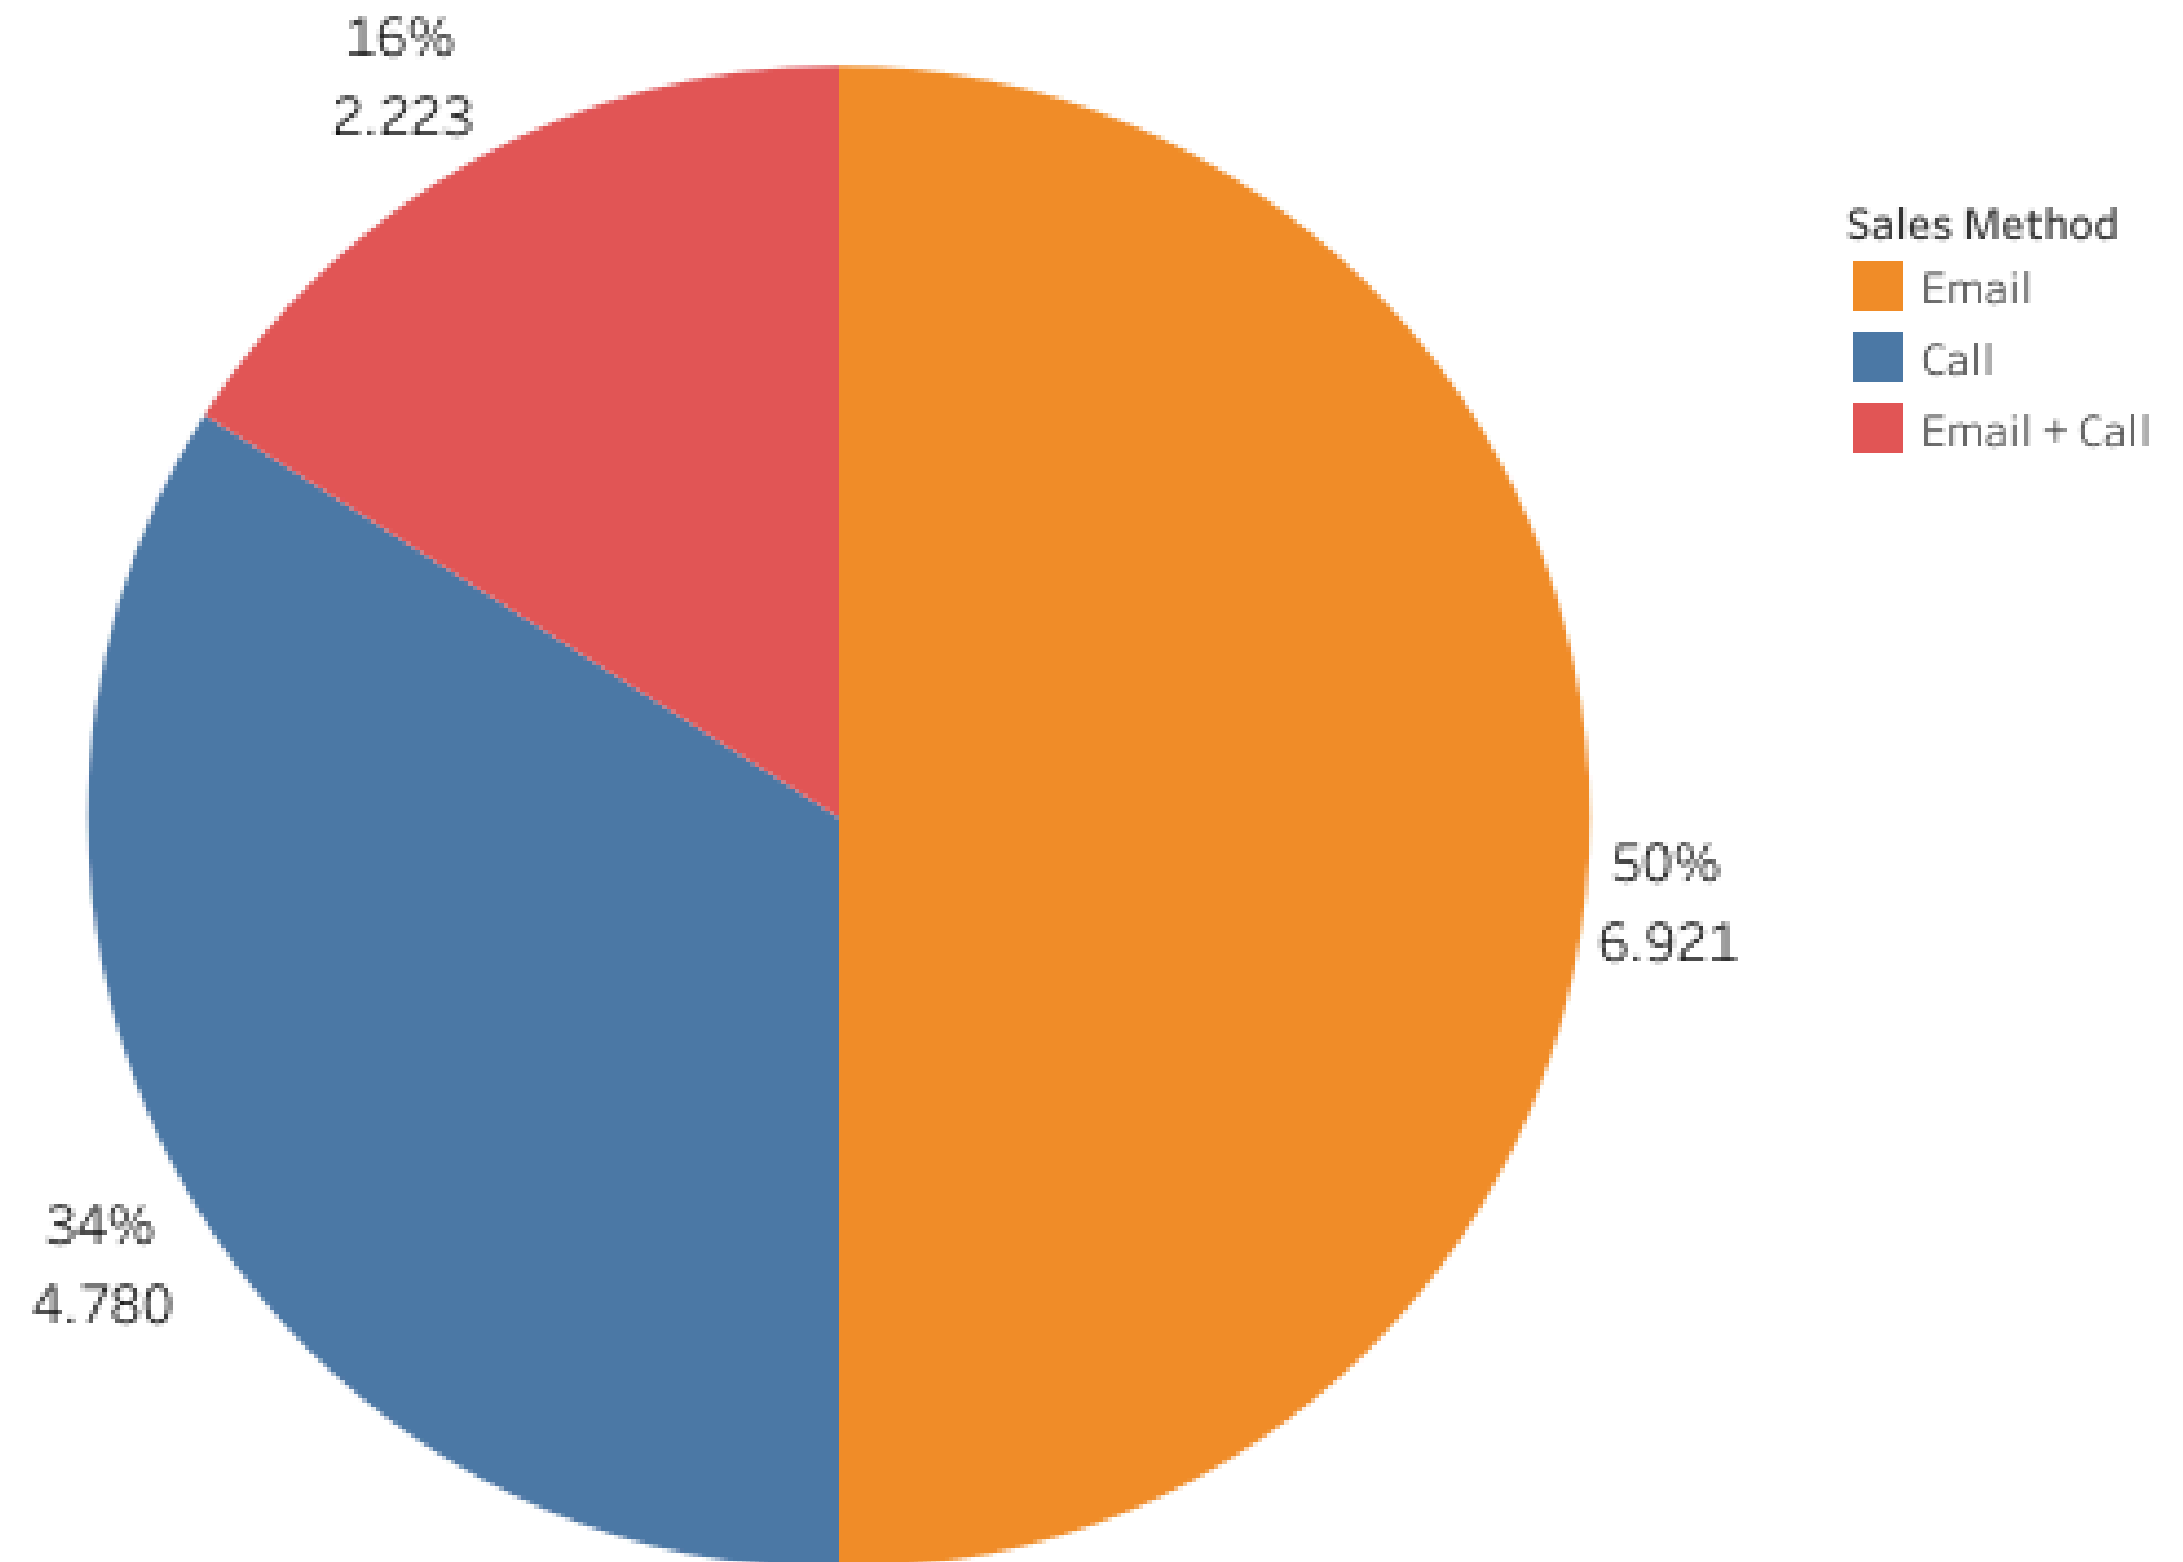

New Column Created:

customer_category:
Segmentation for
behavioral analysis

Insights from Customer Sales Methods

Customer Distribution

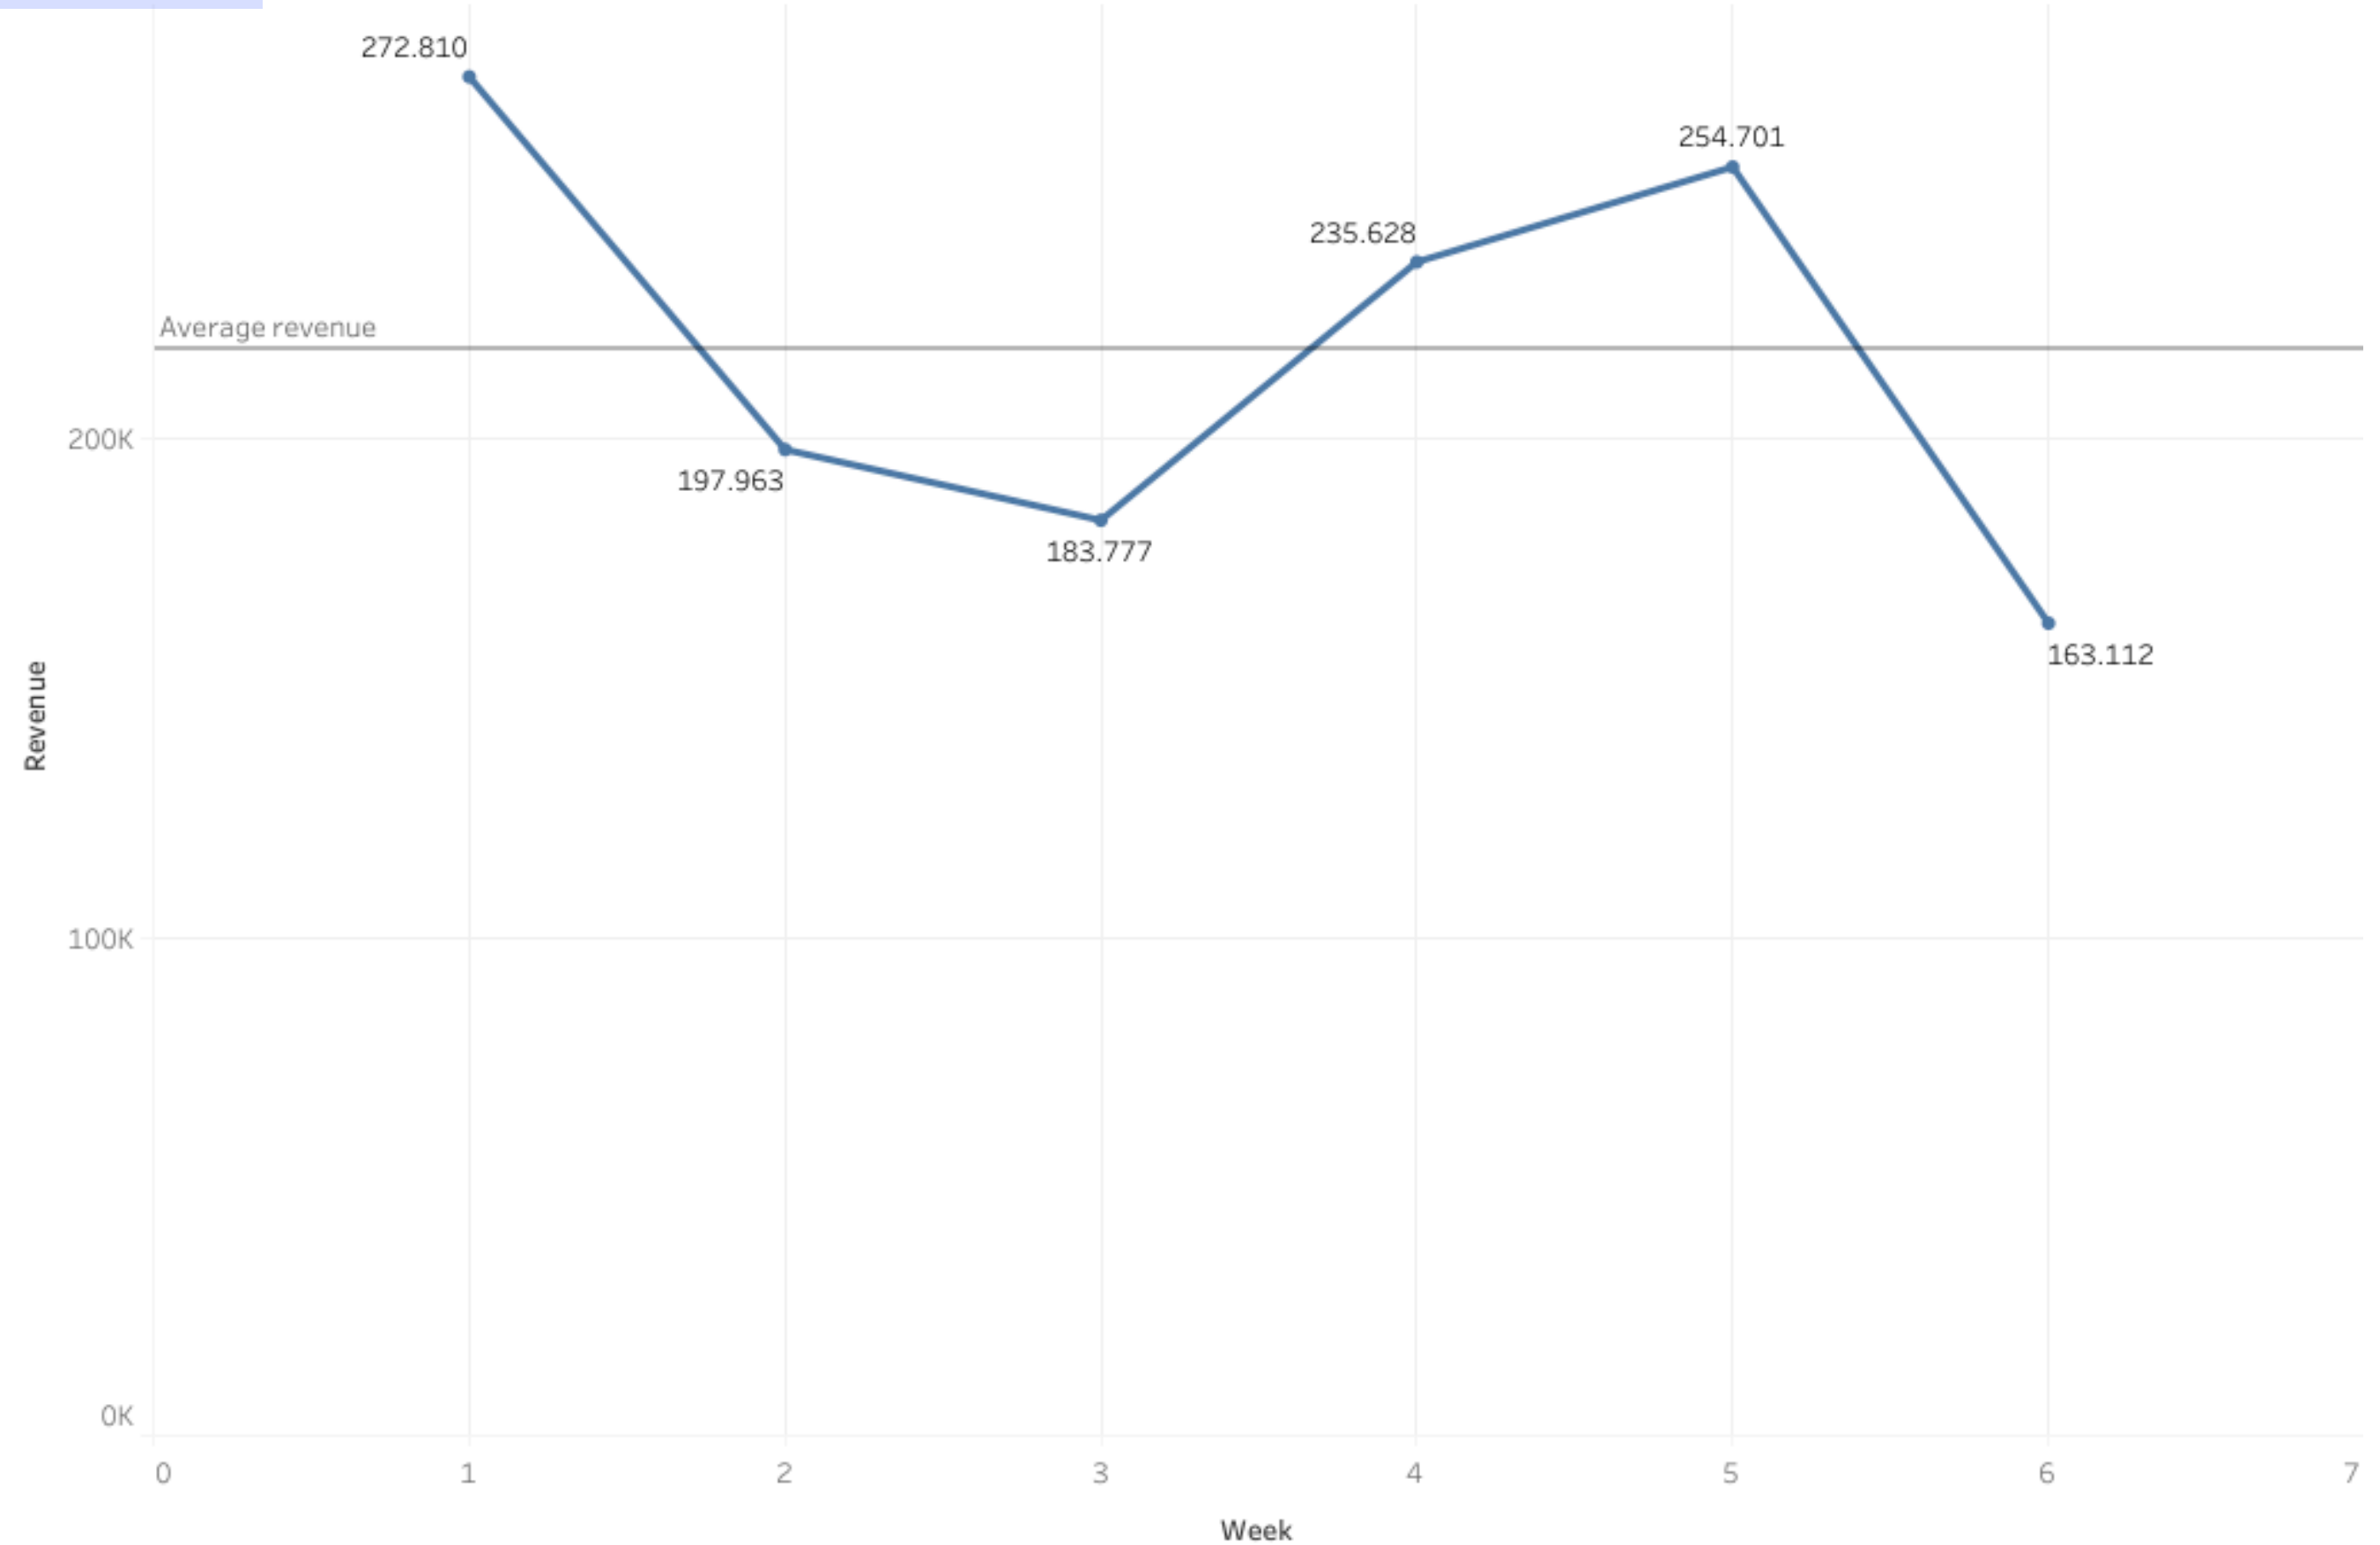

- Email: 6,921 customers (50%)
- Call: 4,780 customers (34%)
- Email + Call: 2,223 customers (16%)

Insights from Customer Sales Methods

Revenue Trends

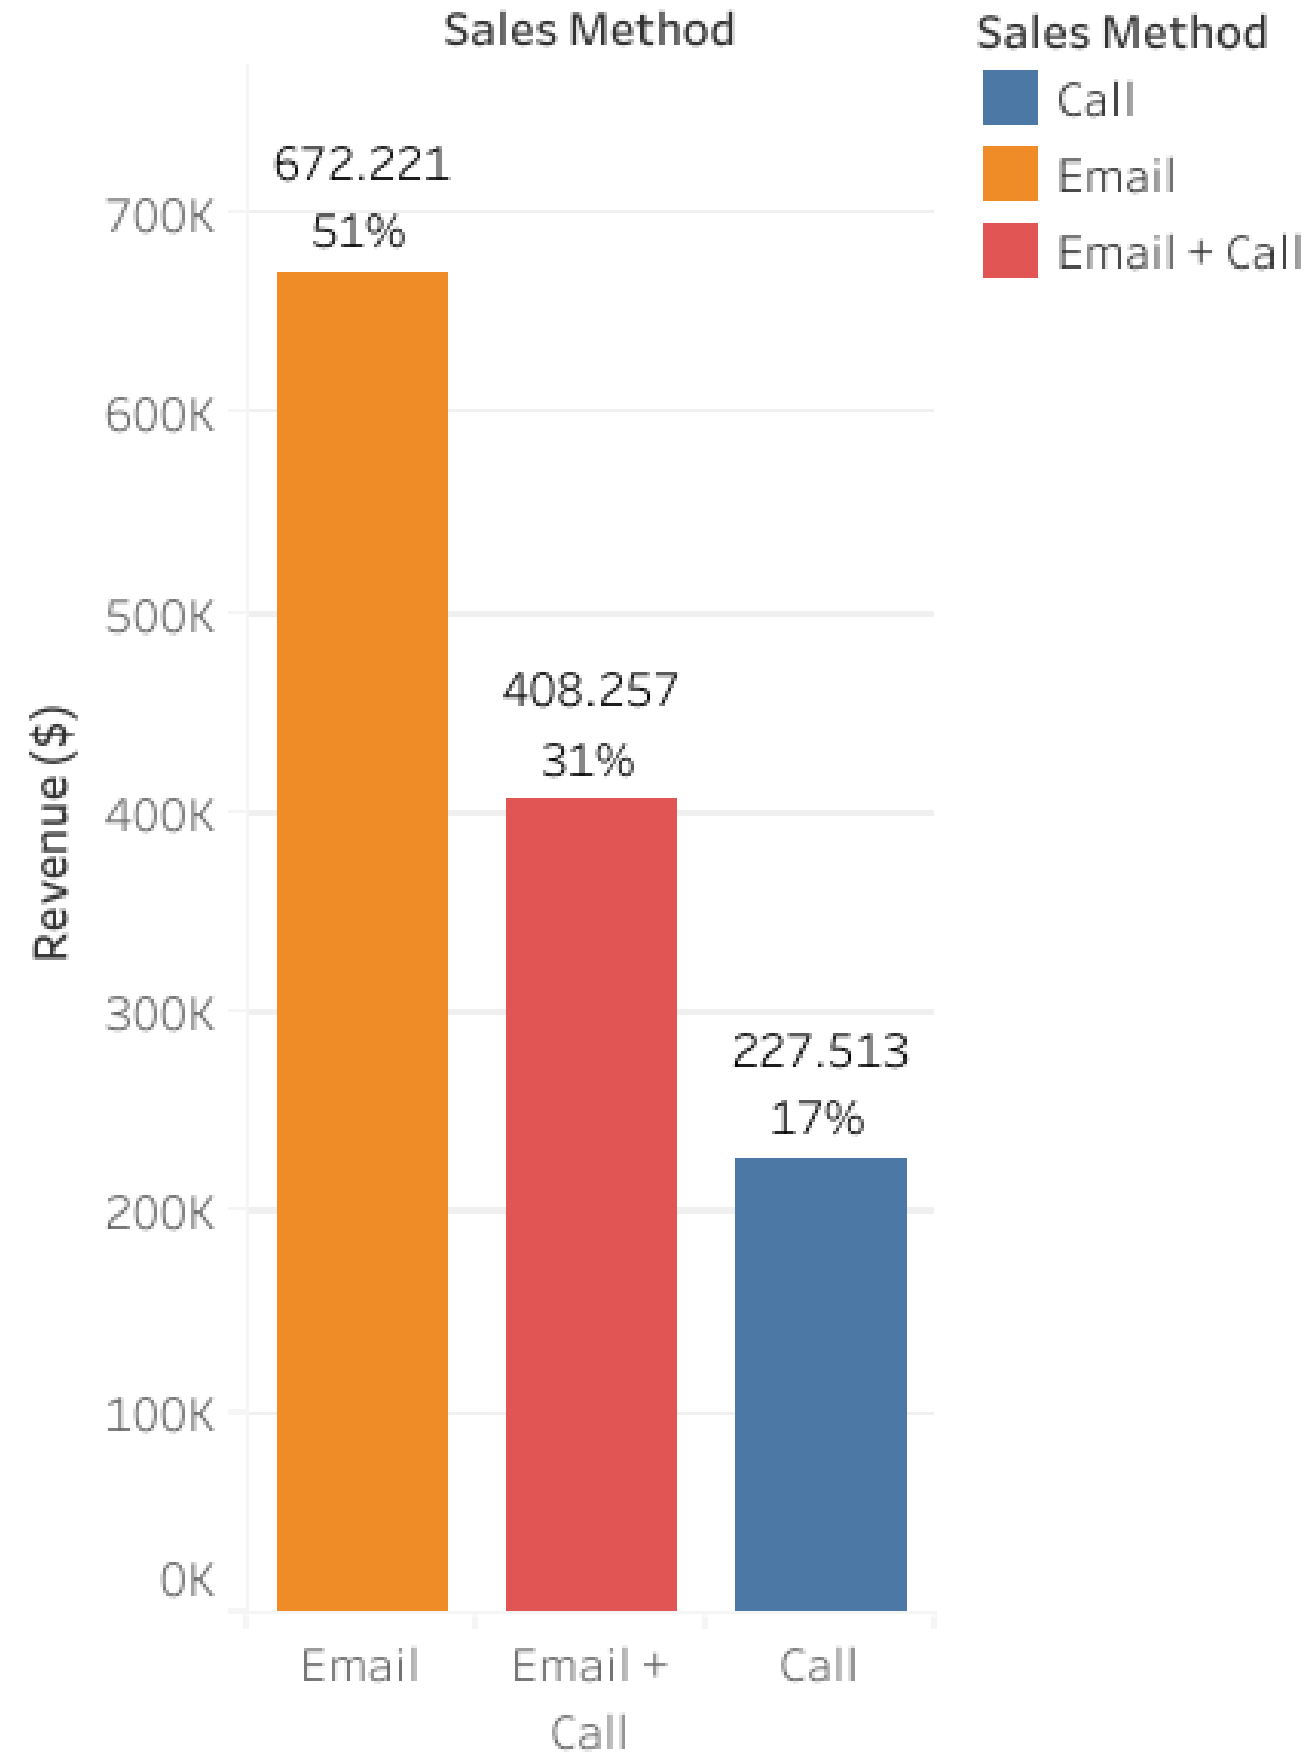

- Highest revenue week: \$272,810
- Revenue fluctuation across weeks

Revenue Analysis by Sales Method

Revenue Contribution:

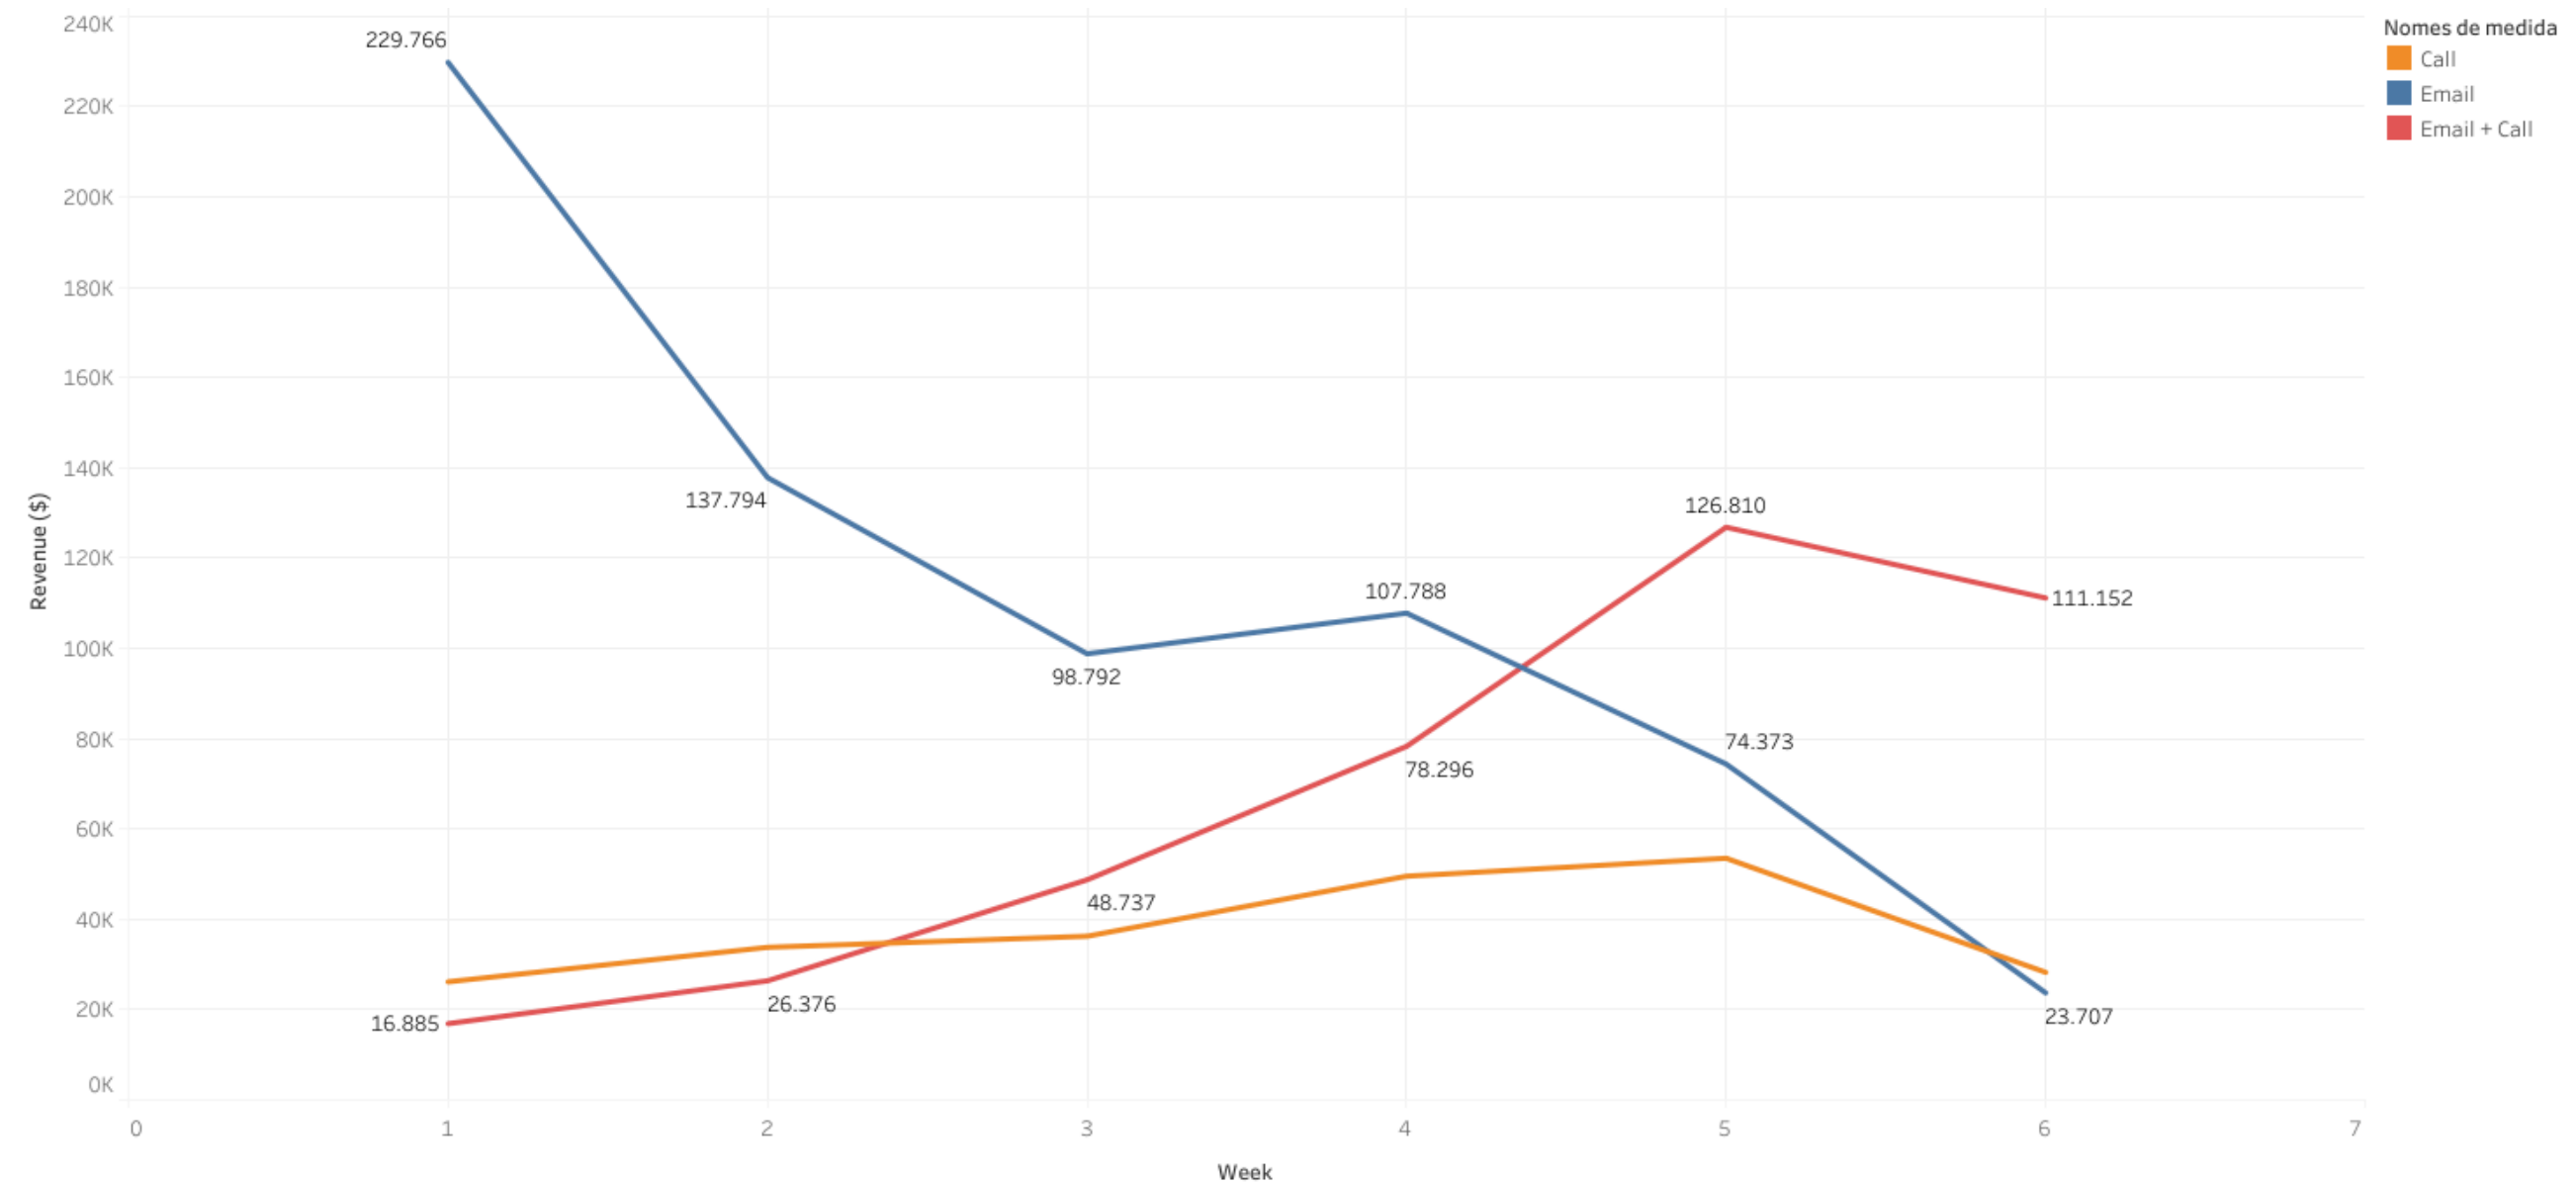

- Email: \$672,220 (53%)
- Email + Call: \$408,256 (31%)
- Call: \$227,513 (17%)

Revenue Analysis by Sales Method

Trends Over Time:

- Email peaked initially, but declined over weeks
- Email + Call gained momentum in later weeks

Metric for Continual Monitoring

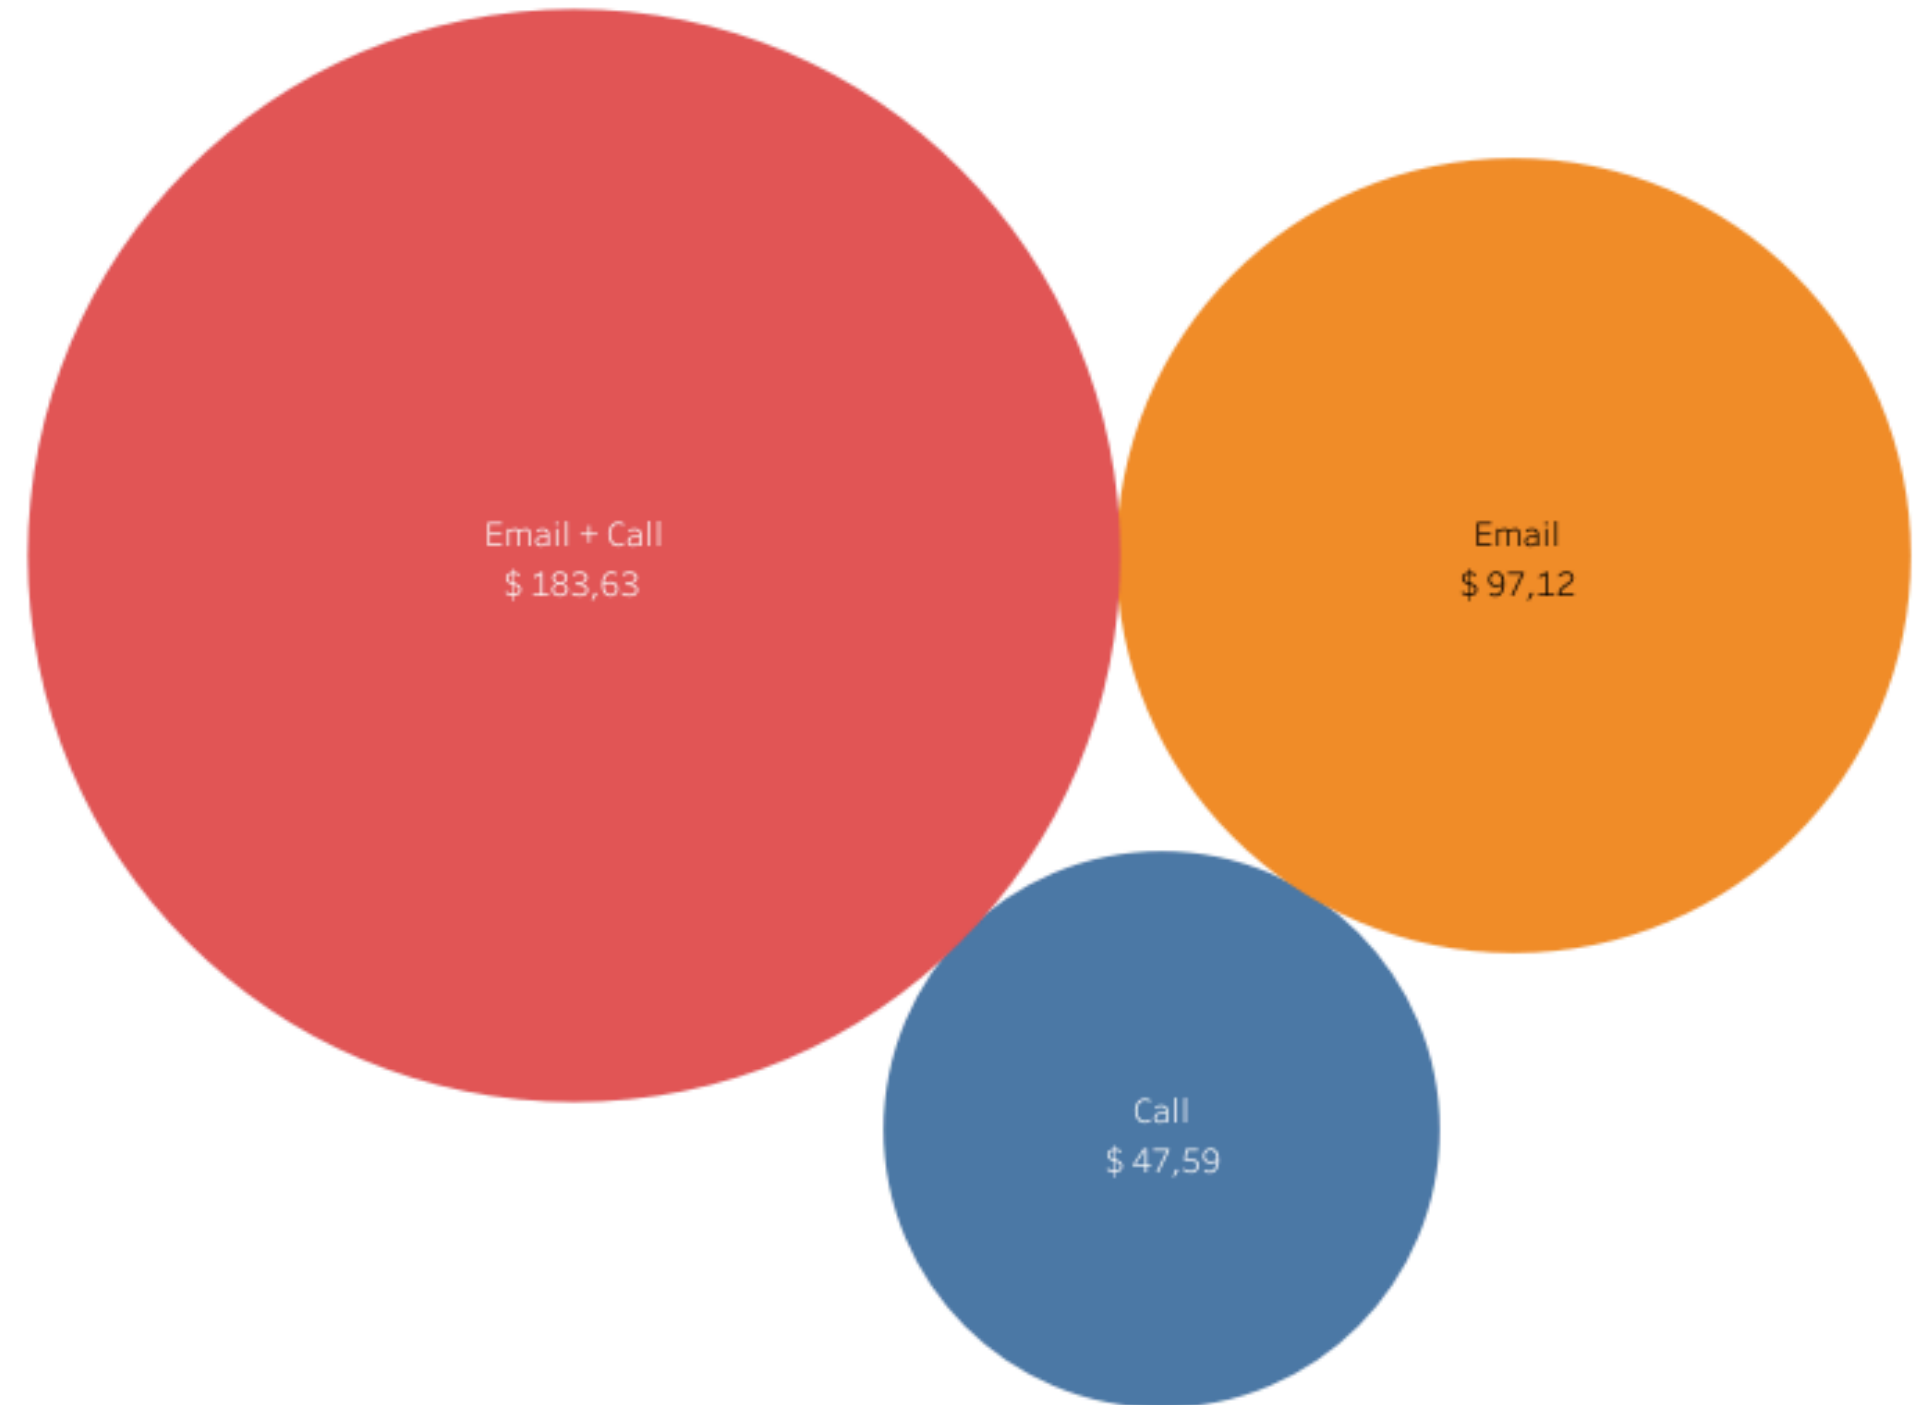

Revenue per Customer by Communication Method (RPC)

- Tracks average revenue generated per customer for each sales method.
- Enables continuous measurement of profitability and customer engagement efficiency.

Baseline Values

From existing data

- Email + Call Method: \$183.63 per customer
- Email Method: \$97.12 per customer
- Call Method: \$47.59 per customer

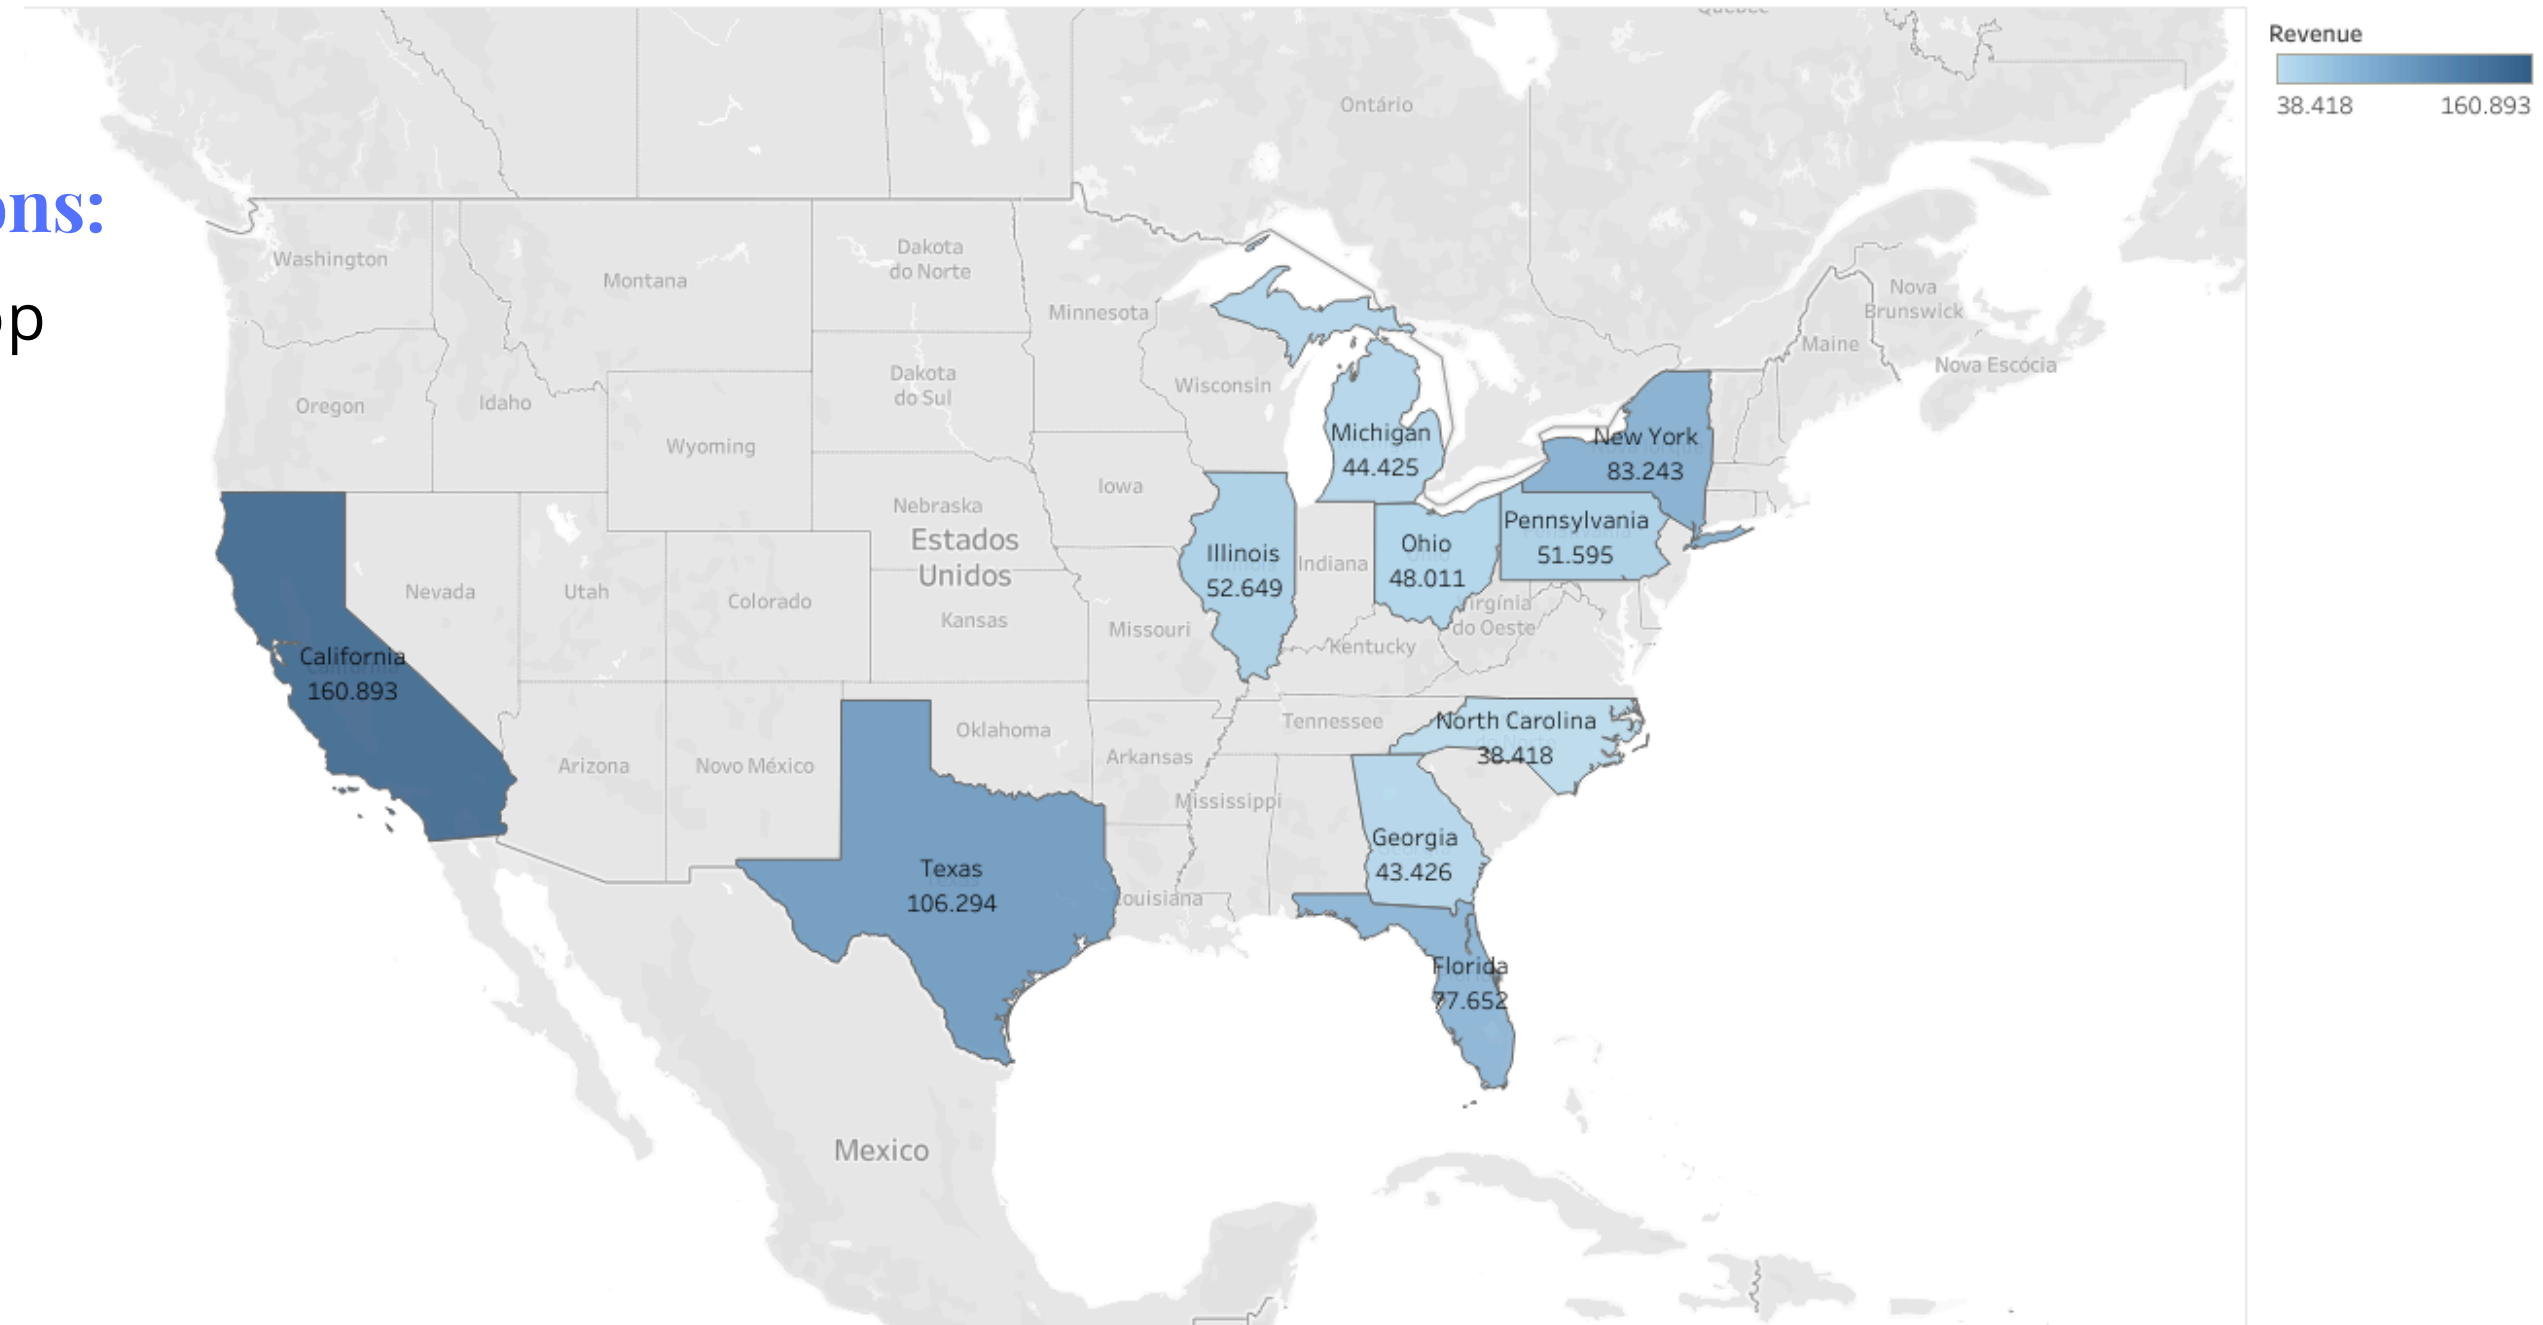

Key Observations on Sales Performance

- Email method: Highest revenue with the best weekly performance of \$229,765
- Call method: Consistent underperformance with a peak of only \$53,518
- Conclusion: Email is the most efficient method for revenue generation. Gain in RPC when combined with Call method.

Trends and Patterns in Customer Behavior

State-wise Revenue Contributions:

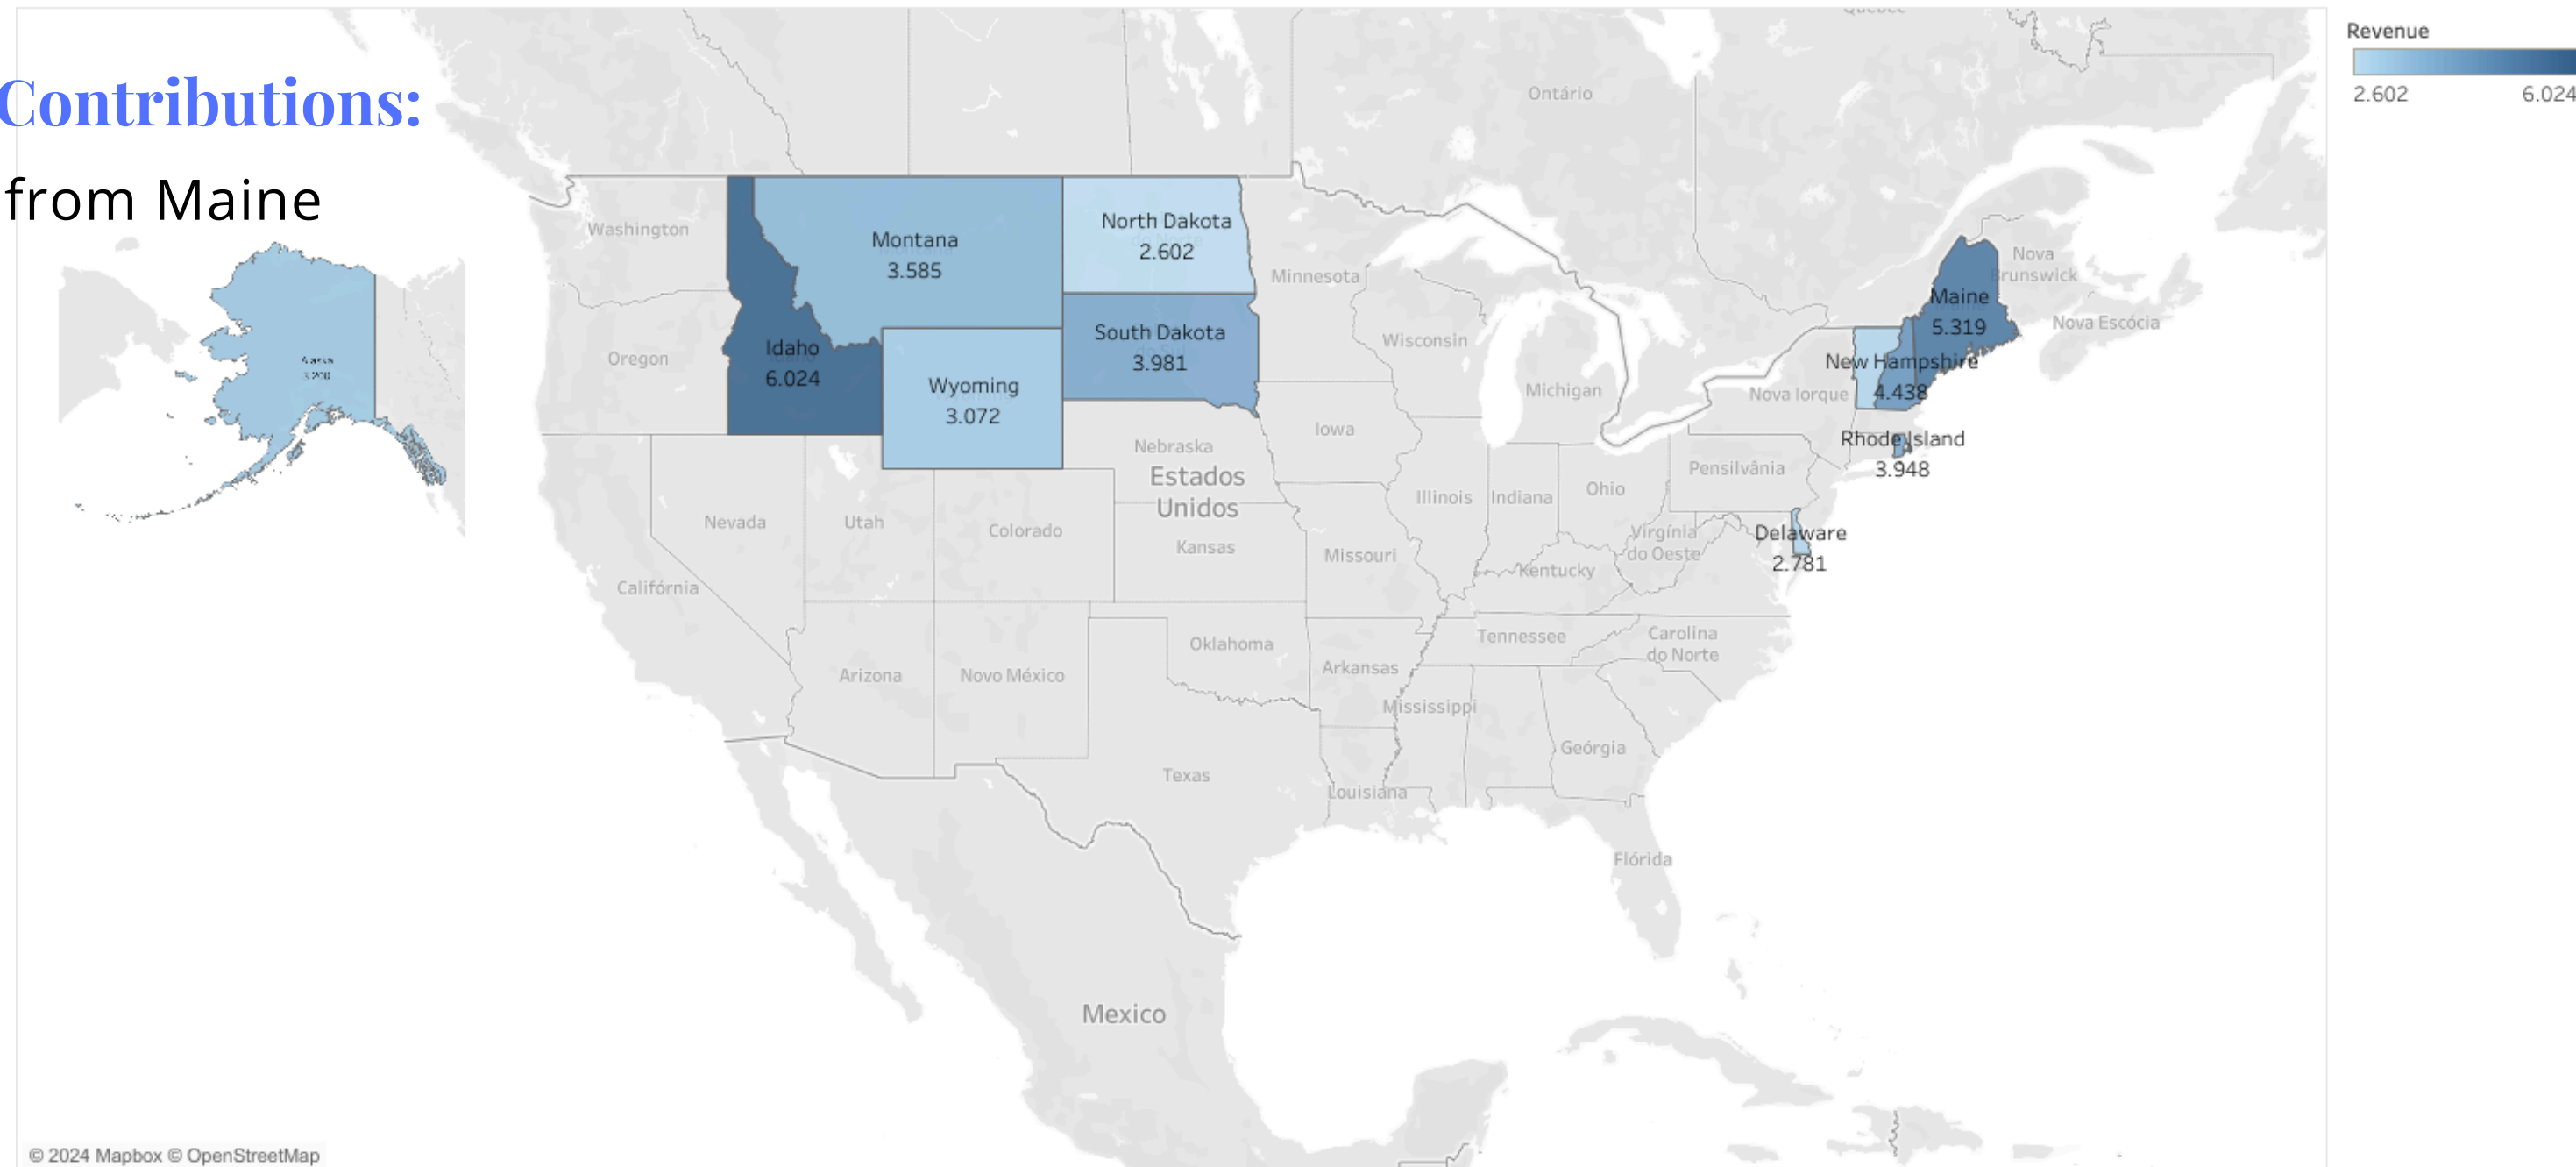

California, Texas, New York are top performers

Trends and Patterns in Customer Behavior

State-wise Revenue Contributions:

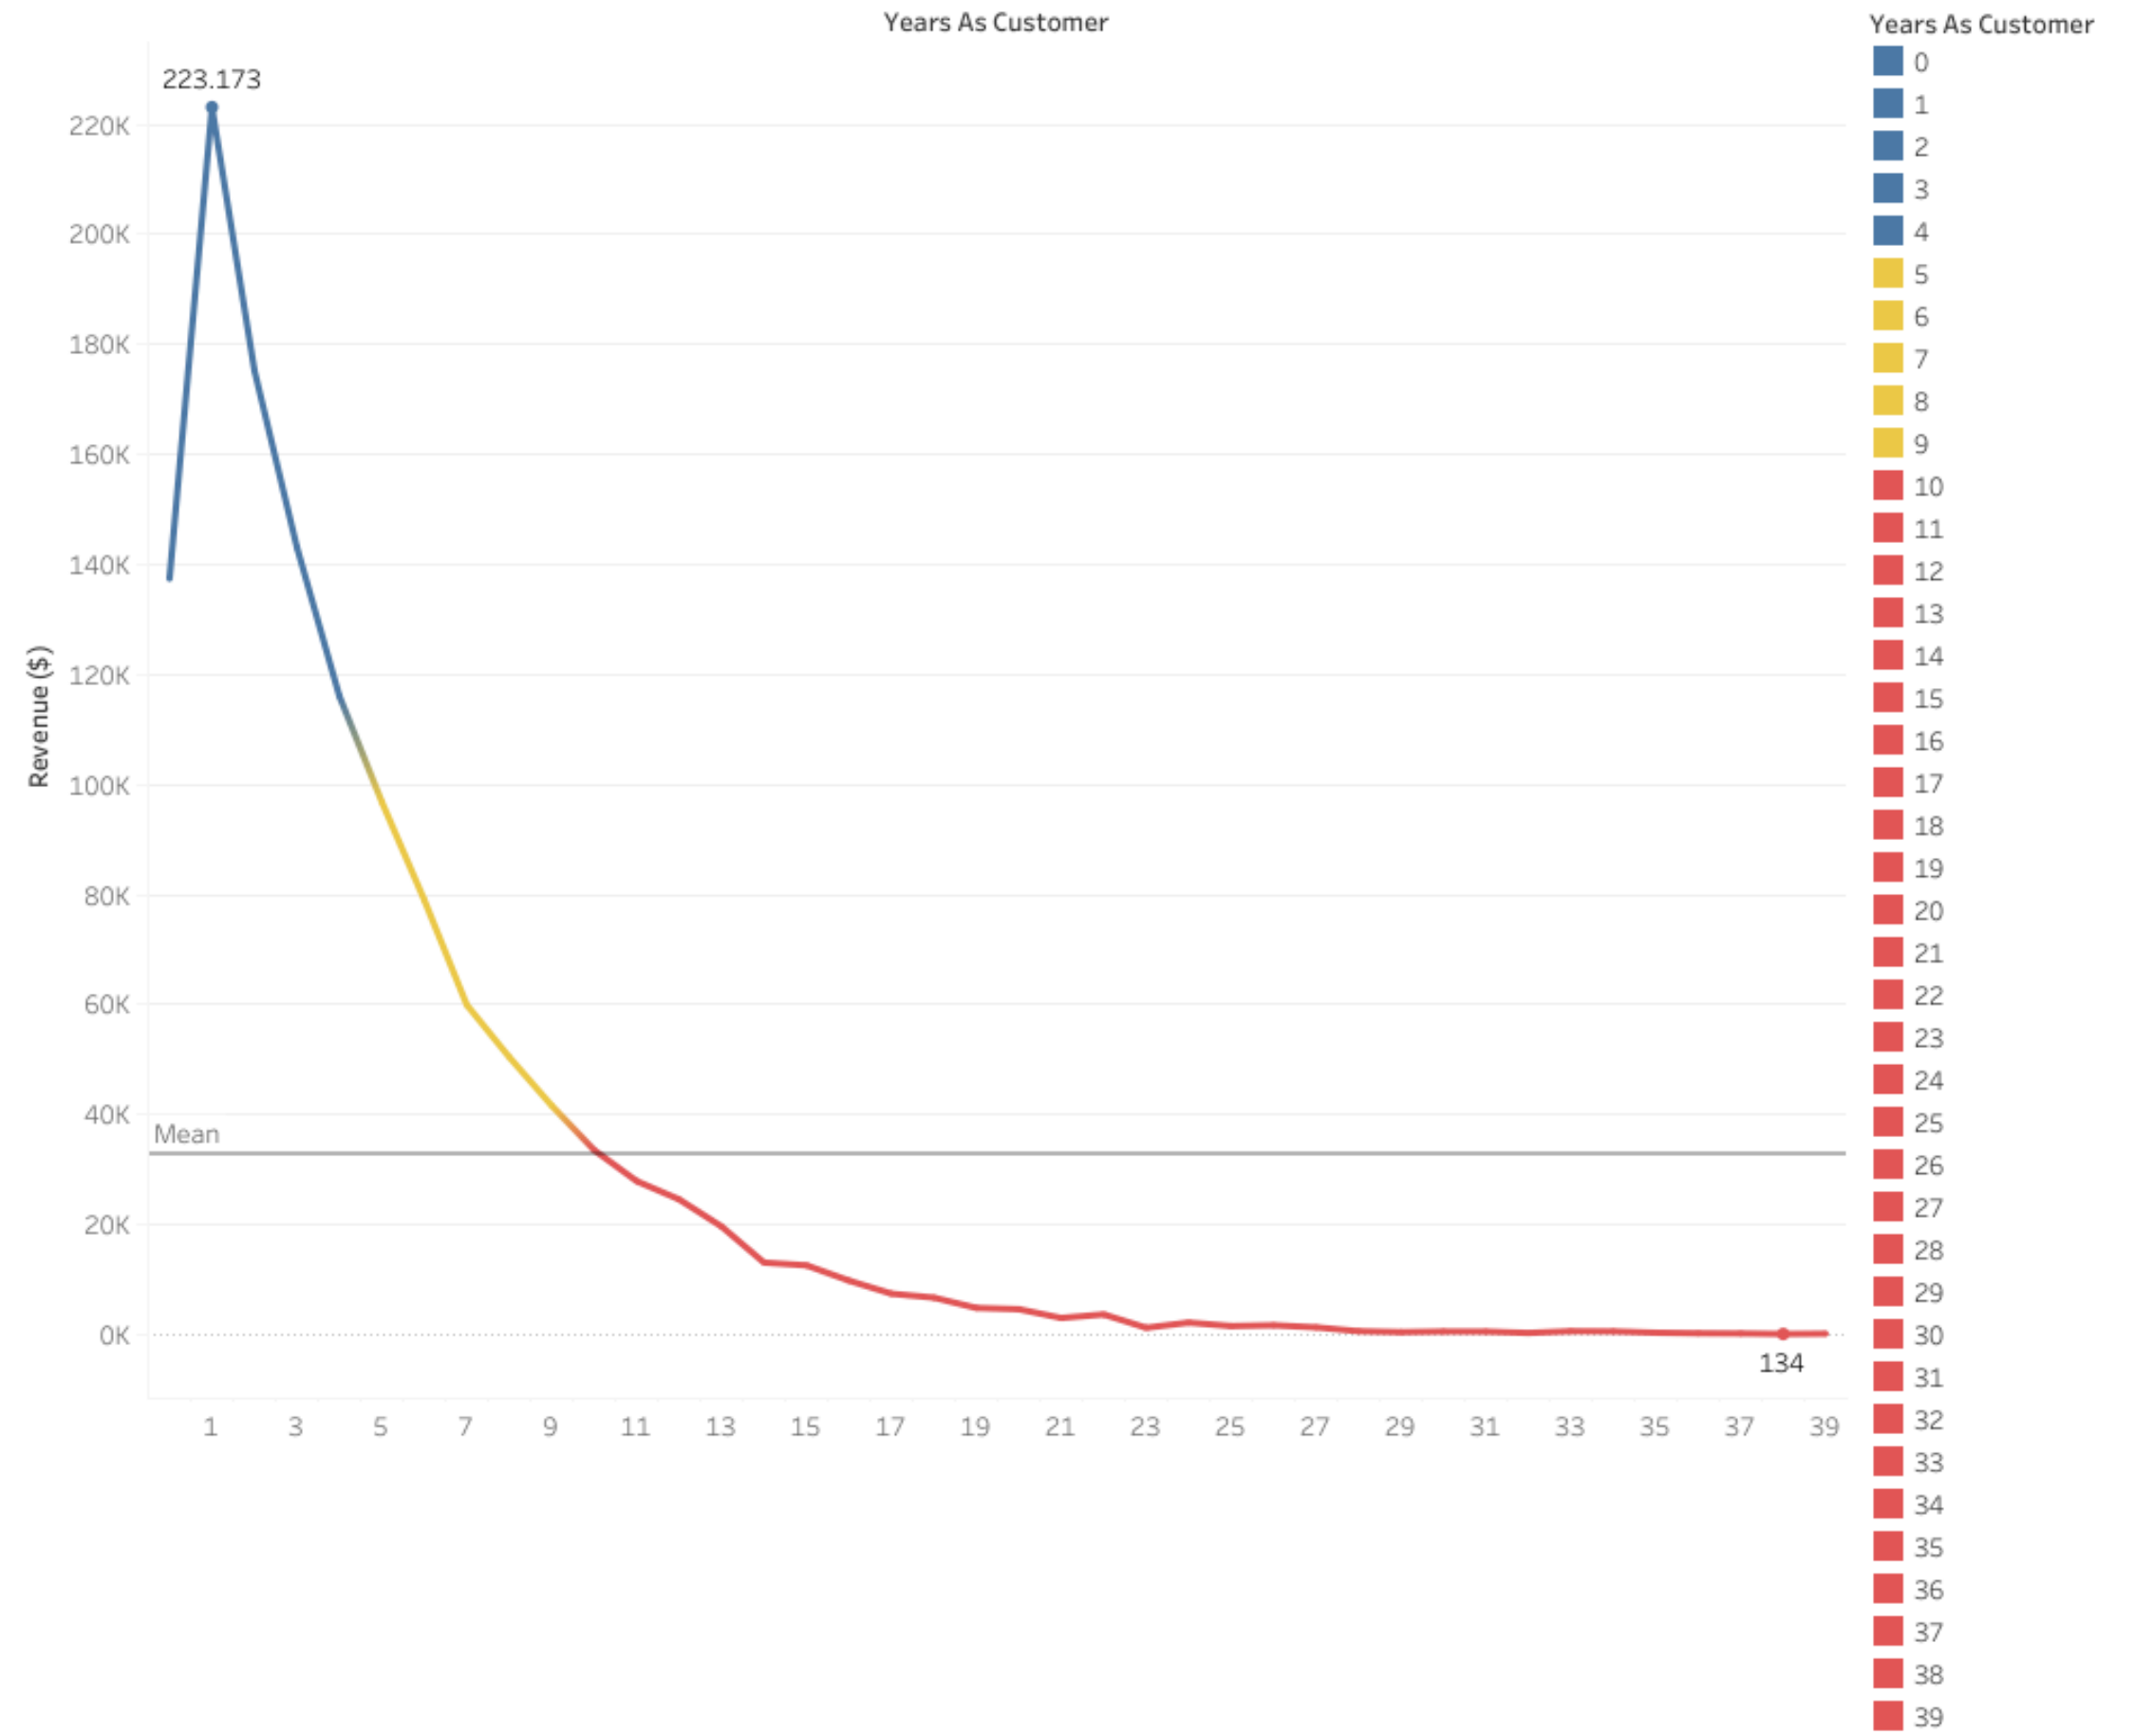

Lowest contributions from Maine and North Dakota

Customer Tenure Insights

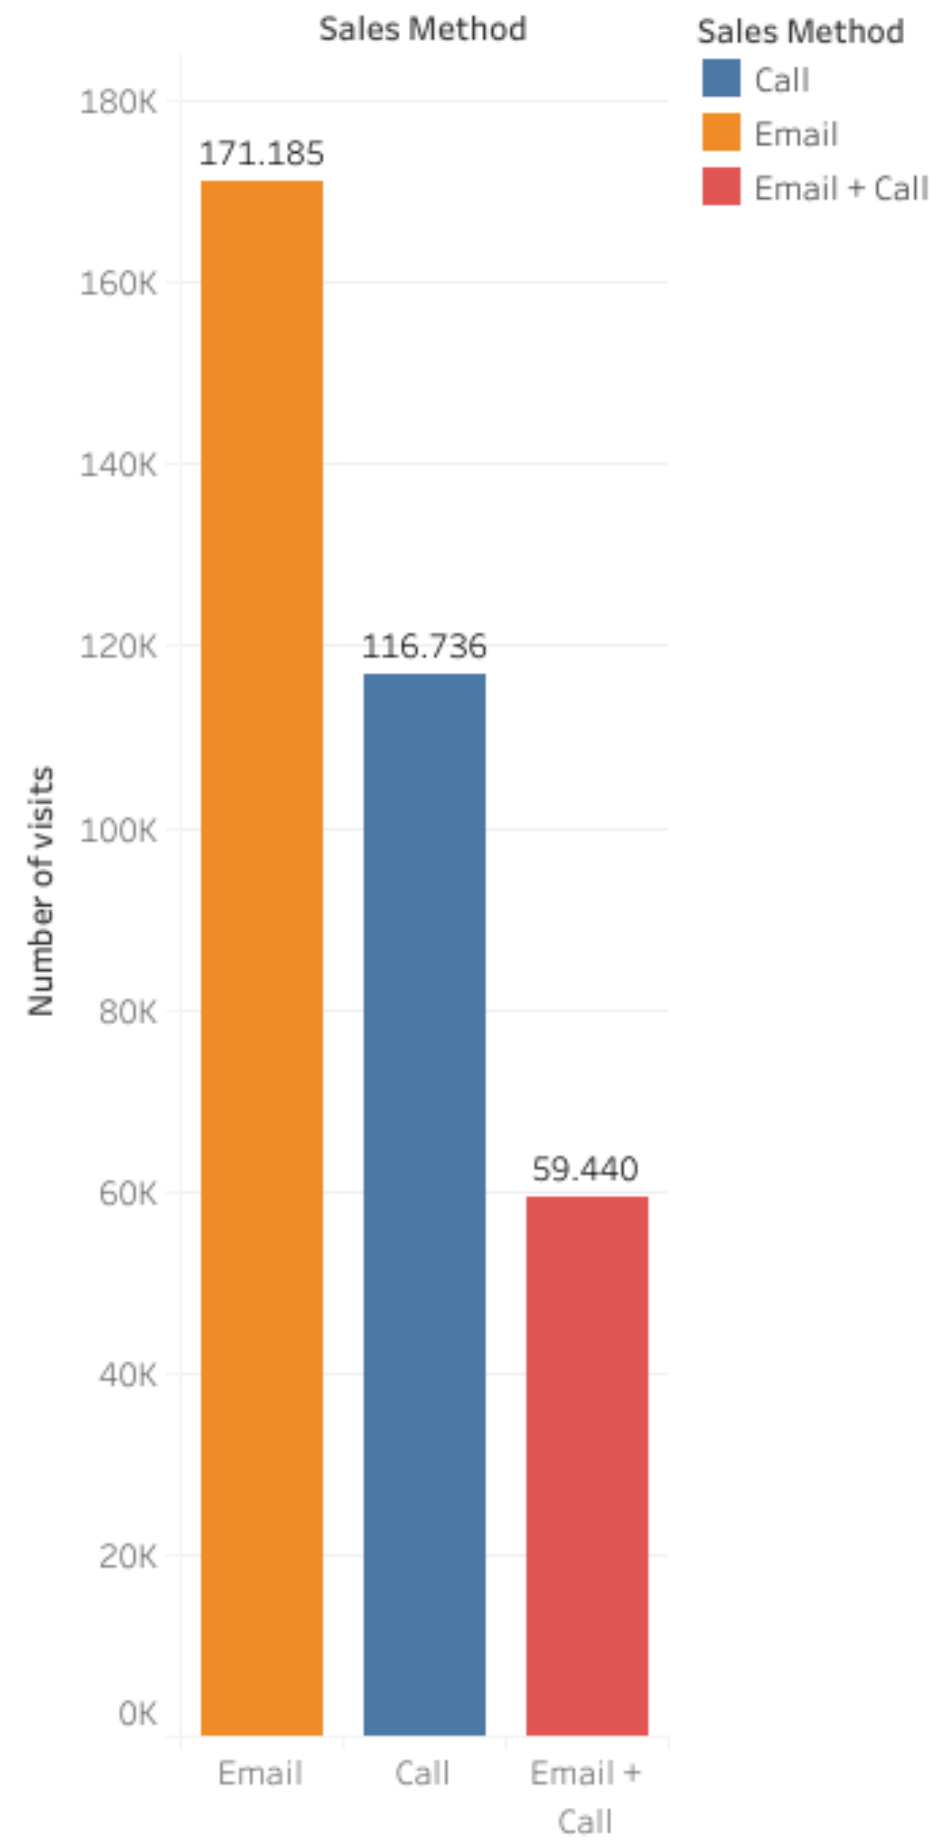

5 years: 60% of total sales

Customers beyond 10 years
contribute minimally

Website Visits:

Email method drove over 171,000 visits

Recommendations

Focus on Email Sales Method:

- Prioritize and enhance email communication

Reassess Call Strategy:

- Reduce resources allocated to the Call method

Enhance Email Marketing:

- Tailor strategies based on customer behavior insights

Continuous Monitoring:

- Regularly analyze sales data to adjust strategies

Conclusion

- Comprehensive analysis reveals effective communication methods
- Focus on Email to drive customer engagement and revenue
- Informed recommendations will guide strategic adjustments
